PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with 4+ years of experience designing and delivering scalable web applications, ERP systems, and e-commerce platforms. Proven ability to reduce operational costs by 40% and cut manual workloads by 60% through smart automation. Proficient across the full stack — from React Js and Flutter front-ends to Node.js, Django, and RESTful API back-ends working with AI coding agents for scaffolding, debugging, and delivery; AI integrations. — with a track record of collaborating across teams to ship impactful, production-ready software.

WORK EXPERIENCE

Freelance Developer — Remote *Jan 2025 – Present*

- Deliver full-stack web projects for clients on Upwork, owning each project from requirements to delivery and communicating with clients directly.
- voxvoyager.co.zw – Developed using React Js, Node Js and Supabase. A web app system designed for a travel agency company.
- infobytsolutions.xyz – Developed using React Js, Node Js, Vite. Designed for an IT Solutions company.
- AI chatbot integrations.
- Payment gateway integrations.

Web Developer — Vostertech Consultancy *May 2023 – Jan 2025*

- Architected and delivered a full consultancy ERP system, cutting operational costs by 40% and becoming the company's core business management platform.
- Collaborated with cross-functional stakeholders to translate departmental requirements into a unified application system and public-facing website.
- Led automation and data migration initiatives that reduced manual workload by 60%, freeing staff to focus on higher-value activities.
- Provided ongoing helpdesk and end-user support, ensuring high system adoption and satisfaction.

Software Developer — Chitosystems *Dec 2021 – Mar 2023*

- Designed and built an end-to-end online ordering system for the fast-food sector, handling menu management, orders, and payment integration.
- Co-developed CollaboMe, an online collaboration platform for artists, including user profiles, project spaces, and real-time communication features.
- Contributed to an e-learning platform for primary and secondary schools, enabling digital content delivery and student progress tracking.
- Conducted system training sessions for end users and managed ongoing system administration duties.

IT Support Officer (Internship) — Seke Teachers' College *Aug 2019 – Dec 2020*

- Managed hardware/software troubleshooting, OS installations, and network configuration across the campus.
- Administered databases and servers, ensuring high availability and data integrity.
- Delivered ICT lessons and training workshops to staff and students.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, C#, VB .NET, Dart, Python.

Frameworks & Technologies: React Js, Node Js, Flutter, WordPress, Silverstripe CMS, Vite.

Databases & Tools: MySQL, NoSQL MongoDB, Supabase, RESTful APIs.

Dev Ops & Tools: Git / GitHub, Docker, Kubernetes.

AI Native Workflow: AI coding agents for scaffolding, debugging and delivery, AI integrations.

Core Competencies: System Architecture · ERP Development · Process Automation · Networking · Hardware Maintenance · Software Design & Development · Mobile Development · Technical Training · CI/CD · AI Integrations ·

EDUCATION

BSc Honours in Information Systems, 2.1 Honours — Midlands State University (Aug 2017 – Nov 2021)

Advanced Level — Lighthouse Institute (Jan 2015 – Nov 2016)

CERTIFICATIONS

Oracle Cloud Infrastructure Foundations Associate — Sept 2023

National Foundations Certificate in Electronic Data Processing (HEXCO) — Nov 2013
